

Associated Builders and Contractors, Inc.

Excellence in Construction Award, 2007

Worthington Residence Renovation Churchville, MD

Work involved renovating a three-story house to modern standards while working around the original structure. We also constructed the additions of a three-car garage, an entry, a front porch, a sunroom/conservatory and a master bathroom with a laundry area and a walk-in closet. The owner said, "All the folks who worked on the project were great, and your company has truly created my dream home." This project received an Award of Excellence.
